

MOVE is moving!

The Moving the Future (MOVE) project -funded by the EU COSME programme- aims at creating a European Strategic Cluster Partnership in the field of mobility industry, fostering the European collaboration between clusters in transport and logistics, ICT and green technologies. The objective of MOVE is to use cross-sectoral and cross border cooperation to create a new value chain as well as to foster SMEs' internationalization in North Africa and Latin America.

Move will last 12 months and among all the activities that will be implemented, the project partners will:

- perform a study and analysis of strategic partners in Europe
- build capacity among our clusters' members in development and management of European collaboration activities
- carry out intelligence gathering on market trends and opportunities
- develop a common internationalization strategy and a roadmap for implementation
