

Welcome to MOVE's intelligence newsletter #3

The world's first autonomous, zero emission container ship

A short-range, all-electric coastal container ship known as the Yara Birkeland, being jointly developed by the Norwegian firms Yara and Kongsberg Gruppen, is expected to operate largely autonomously by 2020 or so. [Read more](#)

Better surfing on Trains

An innovative frequency-selective window coating from Siemens is improving mobile radio reception in passenger trains. Passengers are enthusiastic about the resulting signal quality, which is up to 50 times stronger. Railway operators are profiting from lower acquisition- and maintenance costs. [Read more](#)

Self-driving car technology: When will the robots hit the road?

As cars achieve initial self-driving thresholds, some supporters insist that fully autonomous cars are around the corner. But the technology tells a (somewhat) different story.
